1. Claims 1-10, 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for the following:

Claim 1, lines 1-2 "the lift cords";

Claim 6, line 2 "the upper portion";

Claim 6, line 2 "the tapered flange";

Claim 16, line 1 "the upper portion".

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4-9,11,12,14-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Judkins et al. Judkins et al disclose the claimed connector 61 having an inner assembly with relatively moveable members 82,66 secured to a manipulating cord 62, an outer shell including shell sections 65 secured to lift cords 60.

3. Claims 13,20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3634

4. Claims 3,10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Osinga, Elsenheimer et al, Huang, Ortega, Gobidas, Cotton '884 and '946.
